Beginning Showmanship: Grand Champion – Zack Hook, Reserve Champion – Baylee Stratton, Blue Ribbon – Eli Kutsch, Mickayla Lombardi

Young women invited to explore careers in natural resources

A recent straw poll of western universities indicates that women comprise 60 percent of the enrollment in natural resources classes, yet it remains a largely male-dominated field. Teton Science Schools hopes to help more young women discover the potential for careers in this growing arena through a weeklong, hands-on program in June. Through the program, Young Women in Natural Resources, a dozen high school women will have the opportunity for face-to-face interaction with professional women who work in a range of positions within natural resources, ranging from biologists, ecologists and ranchers to attorneys and directors of conservation organizations and agencies. They will experience the day-to-day workplace and participate in frank discussions about the benefits, challenges and preparation for a career in natural resources. Participants will also have the opportunity to enjoy some of the recreational activities around Jackson, including rafting on the Snake River and an evening at the local rodeo. The program will be held June 17-22 at Teton Science Schools' Jackson campus. Cost is \$150 per student, which includes all meals, program materials, activities and lodging. Participants are responsible for their own transportation. Funding support for the program has been provided by Equipoise Fund and Wyoming Women's Foundation. More detailed information, along with registration forms, is available on the Teton Science Schools' website at www.tetonscience.org/ed_summer_youth.shtml. You may also contact Brenda Younkin at 307-734-8725 x 1110 for more information. Space is limited; registration for the program closes April 15.

Teton Science Schools were founded in 1967 to educate, train and inspire students of all ages about the natural world. The schools have a reputation as an innovative environmental education center, and their programs serve as models worldwide. Teton Science Schools are a private 501(c)(3) non-profit educational organization, operating year-round in Jackson Hole, Wyo., in partnership with Grand Teton National Park and as permittees of the Bridger-Teton National Forest. Teton Science Schools do not discriminate on the basis of race, gender, creed or sexual orientation in any of its policies or programs
